

Contributions Summary

This project was completed as a team effort by **Pragna Das, Vanshika Agarwal, Pinak, and Nupur**. While responsibilities overlapped, primary contributions are outlined below.

Pragna Das (2023A2PS0252P)

- Worked on model implementation (VAE, UNet, scheduler)
- Implemented conditioning mechanisms
- Integrated identity features
- Helped improve output stability

Vanshika Agarwal (2023A2PS0275P)

- Led codebase structuring and GitHub integration
- Converted notebook into modular pipeline (extractors, adaptors, diffusion)
- Integrated modules into pipeline.py
- Handled execution flow and debugging
- Assisted in demo preparation

Pinak Sharma (2023A2PS1301P)

- Assisted in pipeline implementation and testing
- Worked on feature extraction modules
- Helped debug runtime issues
- Supported evaluation and verification

Nupur Saxena (2023A2PS1314P)

- Led report writing and documentation
- Prepared figures, tables, and comparisons
- Organized submission materials
- Compiled results and observations

Shared Contributions

- Brainstorming pipeline design and modifications
- Testing with different inputs
- Debugging and identifying limitations
- Preparing demo and presentation
